

CL203: Database Systems lab

Lab Task 06 [Subqueries]

1. Write a new query to display the first and last names of all employees who have worked in total greater than the average number of hours in total during May 2007.
2. Display the park code of only those attraction whose attraction capacity is greater than average attraction capacity.
3. Write a query to display an employee's first name, last name and date worked which lists the difference between the number of hours an employee has worked on an attraction and the average hours worked on that attraction. Label this column 'DIFFERENCE' and the average hours column 'AVERAGE'.
4. Display the names of all Theme Parks where tickets have been recently sold.
5. Modify the above query you entered in task 3 to display all the theme parks where there have been no recorded tickets sales recently.
